Pontoon Category - Bar Seating Configuration

# PARTI KRAFT® Celebration

## 250 Wet Bar Edition

*Taking the parti atmosphere to another level.*

Pontoon boats serve many purposes, but above all they're built with entertainment in mind. Refrigerators, barbecues, serving areas and plenty of seating make them a social platform. And while grills and wet bars aren't new to the market, the folks at Parti Kraft showed they can take the party atmosphere to another level.

And that is why Parti Kraft's Celebration 250 Wet Bar won Trailer Boats 2010 Excellence in Design award in the Pontoon category.

This boat features a unique stern entertainment center. Along with a sizable cooler that shields the engine area, just ahead of that is a fiberglass-base bar that includes two comfy stools facing forward and four LED-lit cupholders in a raised counter made of dark acrylic. The builder didn't settle for one bar design either. With several configurations including sink and refrigerator options, it can be ordered to your liking.

The options don't end there. A customizable grill center also is offered behind the driver's seat and you can pick from seven skin colors and nine interior accent colors. An optional sound system upgrade enhances the experience. And if you really want the boat to stand out, a Tiki Bar graphics package is available. It could not have been easy for the design team at Parti Kraft to fit all its features into the 8 1/2-foot-wide model, but the company pulled it off, and has an Excellence in Design Award to show for it.
